(a) Dual Benchmark Agreement Across Bi
Talbot Contour Inversion
Cowan Analytical Series (50 roots)
Rear-Face Peak Temperature
Biot Number Bi
(b) Continuous Laplace vs. Cowan Series Residual
Discrepancy $\|e\|_{L^\infty} \sim 10^{-5}$
Absolute Residual Discrepancy
Biot Number Bi
(c) de Hoog High-Precision Convergence (10^{-55})
Error vs. Gold Standard
Truncation Error
de Hoog Padé Expansion Degree
(d) Off-Resonance Asymptotic Linear Recovery ($B = 0.5$)
Constitutive Defect $\|\theta_{\mathrm{GK}}(\epsilon) - \theta_{\mathrm{F}}\|_\infty$
Linear Asymptote $\propto \epsilon^{1.00}$ ($C_{\mathrm{asymp}} = 3.928$)
Temperature Deviation $\|\theta_{\mathrm{GK}} - \theta_{\mathrm{F}}\|_\infty$
Constitutive Perturbation $\epsilon \equiv \max(\tau_q, \kappa^2)$ ($B = 0.5$)
